

Two Sizes of Gift Bags

Marcie Besecker

Larger Bag

- Use 2 pieces of 12" x 12" DSP
- Score one side of DSP at 2". Think about the DSP direction of the flap and the bag.
- Score remaining 3 sides at 3".
- Card stock to reinforce measures 2 7/8" inch by 5 3/4" inch.
- Cut the tabs off of the bottom of one of the sheets (the two outside tabs). Wedge tabs on other piece.

Smaller Bag

- DSP 12" x 8"
- On the SHORT side first, score at 2" which will be the bottom of the bag.
- Along the LONG side, score at 2, 5 3/4, 7 3/4, and 11 1/2".
- At the 1" and 6 3/4", partially score down the side until almost the next score line. This helps with the crease down the side of the bag for folding.
- Add a bottom support panel of 1 7/8" x 3 1/2"
- Cut the flaps and wedge for easy closing.
